

Brief CV

Name/中文姓名	Hanyu Chen 陈寒玉	Gender	Female 女	
Title (Pro./Dr.)	Professor	Country	China	
University/Department	School of Environmental Engineering, Henan University of Technology			
Research Area	Application of porous carbon materials in environmental catalytic purification technology Study on the detection method of environmental micro pollutants			
<p>1. Rt- IPCR technology has been used as a detection tool to detect PCBs in the environment</p> <p>2. Graphite monoliths and porous carbon material were used as photocatalyst carrier to prepare graphite carbon supported photocatalyst, its application in PPCPs pollutant removal efficacy were studied</p>
