

Brief CV

Name/中文姓名	Weiwei Liu/刘蔚巍	Gender	Male	Photo
Title (Pro./Dr.)	Prof.	Country	China	
University/Department	Central South University/ School of Energy Science & Engineering			
Research Area	Indoor thermal environment and building energy consumption			

Prof. Liu is the director of building environment comfort and safety institute at CSU. He took his doctor's degree at Shanghai Jiaotong University and joined Central South University in 2008. He was invited as a guest researcher to work at ICIEE, DTU during 2013-2014.

His research focuses on the effects of thermal environment on human thermal responses, cognitive performance and energy consumption. He has hosted more than 30 projects, including the National Natural Science Foundation of China project, the State Key Laboratory of Air-Conditioning Equipment of China project, Central South University "Shenghua Yuyin" Talented Person Plan project, and China Railway Rolling Stock Corporation United Research Foundation projects, etc.

He received the 2nd prize for Natural Sciences Award of Hunan province (as the 1st completed) in 2019. As the only winner in the field of thermal environment, he was offered the Young Scientist Award of the Chinese Society of Environmental Sciences in 2016. He supervised a team to win the first prize for National University Student Social Practice and Science Contest on Energy Saving & Emission Reduction of China in 2018.
